PROFILE

Data Scientist with effective over 4+ years of past experience specializing in Machine Learning, Deep Learning, and Natural Language Processing. Proficient in developing and deploying advanced analytical models to drive business insights and optimize processes.

SKILLS:

- | | | | | |
|------------------|-------------|----------------|------------------------|---------------------|
| Machine Learning | Document AI | Langgraph | Claude API, OpenAI API | Statistics |
| Generative AI | Pinecone | Langsmith | AWS | Databases (MySQL) |
| RAG | LangChain | FastAPI, Flask | Python | PySpark, Databricks |

PROFESSIONAL EXPERIENCE

ALGOLEAP TECHNOLOGIES

MAY 2025 - PRESENT

ML ENGINEER

- CLIENT- THOMSON REUTERS(AI ENGINEER)**
 - Engineered a production-scale document intelligence pipeline for converting complex U.S. legal PDFs into structured XML/JAXML outputs using Claude Sonnet-based LLM workflows, achieving zero content loss and reducing processing time from 3 hours to under 5 minutes for 20-document batches.
 - Developed a document intelligence pipeline for extracting and mapping footnotes to in-text references from complex PDF documents using GPT-5.2, Python, and LLM-based extraction workflows.
 - Developed an AI-powered document transformation pipeline that processes tracked changes in Word documents, applies rule and LLM-driven content modifications

PRATHAM SOFTWARE

JUL 2024 - APR 2025

Sr DATA SCIENTIST

- AI Ticket Automation for Logistics:** Architected an AI-driven ticketing workflow using **LangGraph**, **FastAPI**, and Azure OpenAI to automate complex task categorization, summarization, and resolution. Engineered Retrieval-Augmented Generation (**RAG**) pipelines with **Pinecone** for vector search, structuring the agent's routing, tool-calling, and fallback handling to successfully auto-resolve 90% of tickets and reduce manual operational effort by 80%.
- LLM Text-to-SQL Pipeline:** LLM Text-to-SQL Pipeline: Led development using **LangChain** and **OpenAI** to translate natural language into complex SQL for multi-dialect engines. Designed **semantic layers** and integrated Pinecone for accurate schema retrieval, optimizing query **latency** by 75%.
- AI Agent for NDA Conflict Resolution:** Developed an agent with GPT-4 and Azure ML Studio to analyze NDAs and flag conflicts; integrated with Microsoft Teams for seamless contract review within enterprise workflows.

LANDMARK GROUP

TRAINEE DATA SCIENTIST

Dec 2022 - March 2024

- Analyzed business requirements and provided data-driven solutions for stakeholders across various **MARKETPLACE**.
- Tech:** Python, XGboost, Databricks, Mlflow.
 - O2O Propensity Model (GCC Region):** Developed a model achieving a 50% improvement over traditional methods, effectively targeting 90% of customers in the top 3 deciles, with an event rate of 1.5% or less across 6 countries.
 - Acquisition Model (Homecentre UAE):** Targeted the top 5% of customers, achieving 80% coverage and a lift of over 2 in top deciles.
 - MLOps Pipeline (Centrepont UAE):** Designed and deployed a Stage 1 pipeline to generate customer propensity scores, enabling efficient forecasting for targeted campaigns.

EUNIMART Pvt Ltd

NOV 2021 – SEP 2022

MACHINE LEARNING ENGINEER,

- Tech:** python, BERT, Statsmodel, Autoencoder, Xgboost, Pytorch, LSTM
 - AI Service for SEO:** Built a service for keyword and volume prediction to optimize omnichannel e-commerce platforms.
 - Personalized Onboarding Journey:** Developed a user onboarding system with 95% statistical significance, improving user flow and reducing friction points.
 - Image Blur Removal:** Enhanced and deployed an image deblurring solution for e-commerce platforms, reducing model size by 40%.

iNeuron Intelligence

MAY 2021 – AUGUST 2021

COMPUTER VISION INTERN

- **Tech:** python, Tensorflow, flask, Data Labelling,
 - Developed a Computer Vision solution for visually impaired individuals, employing Multimodal learning (CV+NLP) for "Visual Question Answering."
 - Implemented the **Hierarchical Co-attention paper**, enhancing the model's capabilities and contributing to advancements in attention mechanisms.

EXPOSYS DATA LABS

JULY 2020 – AUGUST 2020

DATA SCIENCE INTERN

- Implemented clustering algorithms on mall data to identify customer segments, optimizing targeted marketing strategies

THE SMARTBRIDGE

APRIL 2020 – MAY 2020

SUMMER INTERN

- Implemented a Random Forest model for "Quality Prediction in the Mining Process."
 - Applied machine learning techniques to analyze and predict the quality of mining outputs, contributing to process optimization.
-

EDUCATION

JUN 2019 – MAY 2021

GITAM UNIVERSITY

M.TECH IN DATA SCIENCE

SEP 2012 - MAY 2016

Jawaharlal Nehru Technological University Hyderabad (J.N.T.U.H)

B.Tech in Mechanical Engineering

CERTIFICATION

Machine Learning Engineering for Production (MLOps)
